INSTRUCTIONS FOR USE

Shake the container well before using the product. Carefully open the container, measure the quantity of product with a plastic measuring cylinder or any other suitable graduated utensil; combine the product in a bucket with water, shake, and then add to the application tank.

Sirrush® is a microorganism-based product that promotes root development, which improves the absorption of nutrients and trace elements that are not readily available to plants. Use this product on the following crops:

FAMILY	DOSE (L/ha)	APPLICATION PERIOD
Asteraceae Sunflower and Safflower	1.0, 2.0 and 3.0	Apply three times on soil
Fabaceae Alfalfa, Fava bean, Chickpea, Garbanzo bean, Beans and Peas.		
Poaceae Corn, Sorghum, Oats, Rye, Rice, Barley and Sugarcane
