STOP, READ THE LABEL BEFORE USING THIS PRODUCT

Directions for Use

Shake the container thoroughly before use. Open the container carefully and measure the required amount of product using a plastic graduated cylinder or another graduated utensil intended specifically for this purpose. Mix the required amount of product with water in a bucket and agitate. Then add the mixture to the application tank.

Levat® is a microorganism-based product that supports root development, thereby improving the absorption of nutrients and elements that are otherwise difficult for plants to access. Use this product on the following crops:

Family / Crops	Rate (US gal/acre)	Application Timing
Asteraceae Sunflower and safflower	0.11–0.21	Make two applications
Fabaceae Alfalfa, fava bean, chickpea, green bean, common bean, and pea		
Poaceae Corn, sorghum, oats, rye, rice, barley, and sugarcane
