Coverfilm® | LIQUID

COMPOSITION

Ingredient	% by weight	Additional information
Polyalkylene oxide siloxane copolymer; polyalkylene-oxide-modified heptamethyltrisiloxane; methyl allyloxy polyethylene glycol	50.00 - 100	Equivalent to 1,007 g a.i./L

OMRI anm-17213

STOP. READ THE LABEL BEFORE USE. WARNING: HARMFUL IF INHALED.

PRODUCT DESCRIPTION

Coverfilm® is a next-generation organosilicone adjuvant that acts as a spreader, penetrant and wetting agent. It is intended for tank mixing with water-applied pesticides and foliar fertilizers.

PREPARATION AND APPLICATION

Follow the pesticide label. Fill the tank with water, add the pesticide while agitating, then add the required amount of Coverfilm® and continue filling the tank while maintaining agitation.

RECOMMENDED USES

Crop(s)	Target pest/disease or use	Rate	Preharvest interval	Directions
Herbicides and defoliant	Adjuvant	45 – 100 mL / 100 L of water	Per tank mix	
Insecticides and fungicides	Adjuvant	30 – 60 mL / 100 L of water	Per tank mix	
Aerial applications	Adjuvant	90 – 125 mL / 100 L of water	Per tank mix	
Foliar fertilizers	Adjuvant	45 – 100 mL / 100 L of water	Per tank mix
